Doctor's thesis:

Lösung der ersten und zweiten Randwertaufgaben des Innen- und Außengebietes für die Potentialgleichung im R_3 durch Randbelegung. HMI-Bericht b 41 and Dissertation TU Berlin 1965, D 83.

Habilitationsschrift:

Ein elementarer Existenzbeweis für eine Lösung der Beltramischen Differentialgleichung. Habilitationsschrift TU Berlin 1969 D 83 (Chapter 5 of the monography [M1]).

Articles in Journals:

- [1] with G.Bruhn:
Über die näherungsweise Lösung von linearen Funktionalgleichungen. In: Funktionalanalysis, Approximationstheorie, Numerische Mathematik (eds. L.Collatz, H. Meinardus and H. Unger), Internat. Schriftenreihe Numer. Math., Birkhäuser Basel **7** (1967) 136-164.
- [2] with K.P. Lühr:
Die numerische Lösung der ersten und zweiten Randwertaufgaben unter Verwendung elementarer Greenscher Funktionen. Elektronische Datenverarbeitung **4** (1967) 166-172.
- [3] Die Fredholmsche Alternative für Operatoren, die bezüglich eines bilinearen Funktionals adjungiert sind. Math. Zeitschr. **101** (1967) 61-64.
- [4] Die Behandlung von Randwertaufgaben im R_3 mit Hilfe von Einfach- und Doppelschichtpotentialen. Numer. Math. **11** (1968) 380-404.
- [5] Zur numerischen Behandlung der Randwertaufgaben für elliptische Systeme. In: Numerische Behandlung von Differentialgleichungen. Internat. Schriftenreihe Numer. Math., Birkhäuser Basel **9** (1968) 187-207.
- [6] Über potentialtheoretische Randwertaufgaben in einem zusammengesetzten Gebiet mit Übergangsbedingung und nicht glatten Rändern. Methoden und Verfahren der Mathematischen Physik **2** (1969) BI 721, 125-149.
- [7] Bemerkungen über die Fredholmschen Sätze. Methoden und Verfahren der Mathematischen Physik **3** (1970) BI 722, 141-176.

- [8] with U. Simon:
Zur Indexmethode in der Differentialgeometrie im Großen. *Math. Zeitschr.* **116** (1970) 242-246.
- [9] Über Galerkin-Verfahren zur Lösung des Dirichlet-Problems in L_p -Räumen für gleichmäßig elliptische Differentialgleichungen. *Abh. Math. Seminar Universität Hamburg* **36** (1971) 185-197.
- [10] Über Ähnlichkeitsprinzip und Randwertaufgaben für verallgemeinerte analytische Funktionen. *Applicable Anal.* **2** (1972) 101-110.
- [11] On boundary value problems of generalized analytic functions. In: *Lecture Notes in Mathematics*, Springer **280** (1972) 120-201.
- [12] An integral equation method for generalized analytic functions. In: *Constructive and Computational Methods for Differential and Integral Equations*, *Lecture Notes in Mathematics*, Springer **430** (1974) 414-452.
- [13] with R.P. Gilbert:
Analytic, generalized, hyperanalytic function theory and an application to elasticity. *Proceedings of the Royal Society Edinburgh A* **73** (1975) 317-331.
- [14] with D. Colton:
Constructive methods for solving the exterior Neumann problem for the reduced wave equation in a spherically symmetric medium. *Proceedings of the Royal Society Edinburgh A* **75** (1976) 97-107.
- [15] with E. Stephan:
Remarks to Galerkin and least squares methods with finite elements for general elliptic problems. In: *Partial Differential Equations*, *Lecture Notes in Mathematics*, Springer **564** (1976) 461-471 extended version in: *Manuscripta Geodaetica* **1** (1976) 93-123.
- [16] with H. Jeggle:
On the discrete approximation of eigenvalue problems with holomorphic parameter dependence. *Proceedings of the Royal Society Edinburgh A* **78** (1977) 1-29.
- [17] with R.E. Kleinman:
On Neumann's method for the exterior Neumann problem for the Helmholtz equation. *J. Math. Anal. Appl.* **57** (1977) 170-202.
- [18] with G.C. Hsiao:
A finite element method for an integral equation of the first kind. *J. Math. Anal. Appl.* **58** (1977) 449-481.
- [19] On a class of semilinear boundary value problems for certain elliptic systems in the plane. In: *Complex Analysis and its Applications*. *Akademija Nauk SSR. Dedicated to the 70th anniversary of the Academician I.N. Vekua*, Izdat. "Nauka" (1978) 108-119.

- [20] On the embedding method for semilinear first order elliptic systems and related finite element methods. In: Continuation Methods (ed. H. Wacker), Academic Press, New York (1978) 277-336.
- [21] with G.C. Hsiao and E. Stephan:
On the integral equation method for the plane mixed boundary value problem with the Laplacian. Math. Methods Appl. Sci. **1** (1979) 265-321.
- [22] with G.C. Hsiao and P. Kopp:
A Galerkin-collocation method for some integral equations of the first kind. Computing **25** (1980) 89-130.
- [23] On Galerkin collocation methods for integral equations of elliptic boundary value problems. In: Numerical Treatment of Integral Equations (eds. J. Albrecht and L. Collatz) Internat. Schriftenreihe Numer. Math., Birkhäuser Basel **53** (1980) 244-275.
- [24] with G.C. Hsiao:
The Aubin-Nitsche lemma for integral equations. J. Integral Equations **3** (1981) 299-315.
- [25] with E. Stephan:
Boundary element method for membrane and torsion crack problems. Computer Meth. Appl. Mech. Engrg. **36** (1983) 331-358.
- [26] with D.N. Arnold:
On the asymptotic convergence of collocation methods. Math. Comp. **41** (1983) 197-242.
- [27] with M. Costabel and E. Stephan:
On boundary integral equations of the first kind for the bi-Laplacian in a polygonal plane domain. Ann. Scuola Norm. Sup. Pisa, Ser. IV, **10** (1983) 197-242.
- [28] with J. Saranen:
On the asymptotic convergence of collocation methods with spline functions of even degree. Math. Comp. **45** (1985) 91-108.
- [29] with T.M. Fischer and G.C. Hsiao:
Singular perturbations for the exterior three-dimensional slow viscous flow problem. J. Math. Anal. Appl. **110** (1985) 583-603.
- [30] with U. Lamp, T. Schleicher and E. Stephan:
Galerkin collocation for an improved boundary element method for a plane mixed boundary value problem. Computing **33** (1984) 269-296.
- [31] with R. Rannacher:
On the order of pointwise convergence of some boundary element methods. Part I. Operators of negative and zero order. Mathematical Modelling and Numerical Analysis **19** (1985) 65-88.

- [32] with G.C. Hsiao and P. Kopp:
Some applications of a Galerkin-collocation method for boundary integral equations of the first kind. *Math. Methods Appl. Sci.* **6** (1984) 280-325.
- [33] with G.C. Hsiao:
On a boundary integral method for some exterior problems in elasticity. *Proceedings of Tbilisi University (Trudy Tbiliskogo Ordena Trud. Krasn. Znam. Gosud. Univ.) UDK 539.3, Mat. Mech. Astron.* **257** (18) (1985) 31-60.
- [34] with E. Stephan:
An augmented Galerkin procedure for the boundary integral method applied to mixed boundary value problems. *Appl. Numer. Math.* **1** (1985) 121-143.
- [35] with E. Stephan:
An augmented Galerkin procedure for the boundary integral method applied to two-dimensional screen and crack problems. *Applicable Anal.* **18** (1984) 183-220.
- [36] with U. Lamp and K.-T. Schleicher:
The fast Fourier transform and the numerical solution of one-dimensional boundary integral equations. *Numer. Math.* **47** (1985) 15-38.
- [37] with D.N. Arnold:
The convergence of spline collocation for strongly elliptic equations on curves. *Numer. Math.* **47** (1985) 317-341.
- [38] with T. Fischer and G.C. Hsiao:
On two-dimensional slow viscous flows past obstacles in a half-plane. *Proceedings of the Royal Society Edinburgh A* **104** (1986) 205-215.
- [39] with M. Costabel:
Strong ellipticity of boundary integral operators. *Crelle's Journal für die Reine und Angewandte Mathematik* **372** (1986) 34-63.
- [40] with S. Christiansen:
On the condition number of the influence matrix belonging to some first kind integral equations with logarithmic kernel. *Applicable Anal.* **21** (1986) 175-183.
- [41] with J. Saranen:
The Fourier series representation of pseudo-differential operators on closed curves. *Complex Variables, Theory and Appl.* **8** (1987) 55-64.
- [42] with R. Rannacher:
On the pointwise convergence of some boundary element methods. Part II: Operators of positive order. *Mathematical Modelling and Numerical Analysis* **22** (1988) 343-362.
- [43] with J. Kral:
Some examples concerning applicability of the Fredholm-Radon method in potential theory. *Aplikace Matematiky* **31** (1986) 293-309.

- [44] with E. Stephan:
A hypersingular boundary integral method for two-dimensional screen and crack problems. *Archive Rat. Mech. Anal.***112** (1990) 363-390.
- [45] with K. Ruotsalainen:
On the boundary element methods for some nonlinear boundary value problems. *Numer. Math.* **53** (1988) 299-314.
- [46] with Yu Dehao:
Adaptive boundary element methods for strongly elliptic integral equations. *Numer. Math.* **53** (1988) 539-558.
- [47] with I. Sloan:
A quadrature-based approach to improving the collocation method for splines of even degree. *Zeitschr. Analysis Anw.* **8** (1989) 361-376.
- [48] with W. Mc Lean:
Trigonometric approximation of solutions of singular integral equations and pseudo-differential equations. In: *Operator Theory: Advances and Applications*, Birkhäuser, Basel **4** (1989) 359-383.
- [49] with H. Berger and G. Warnecke:
Finite elements for transonic potential flows. *Numer. Meth. Partial Differential Eqs.* **6** (1990) 17-42.
- [50] with W. Mc Lean and S. Prößdorf:
Pointwise error estimates for the trigonometric collocation method applied to singular integral equations and pseudodifferential equations. *J. of Integral Equations and Applications.* **2** (1989) 125-146.
- [51] with G.C. Hsiao and E.P. Stephan:
On the Dirichlet problem in elasticity for a domain exterior to an arc, *J. of Computational and Applied Mathematics* **34** (1991) 1-19.
- [52] Qualocation, the new variety of boundary element methods. In: *Wissenschaftliche Zeitschrift der Technischen Universität Karl-Marx-Stadt* **31** (1989) 276-284.
- [53] with K. Kalik:
The approximation of closed manifolds by triangulated manifolds and the triangulation of closed manifolds. *Computing* **47** (1992) 255-275.
- [54] with M.C. Bustos and F. Concha:
Global weak solutions to the problem of continuous sedimentation of an ideal suspension. *Math. Methods Appl. Sci.***13** (1990) 1-22.
- [55] with D. Yu:
A-posteriori local error estimates of boundary element methods with some pseudo-differential equations on closed curves. *J. Comp. Math.* **10** (1992) 273-289.

- [56] with J. Zhu:
The boundary element method for three-dimensional Stokes flows exterior to an open surface. *Mathematical and Computer Modelling* **15** (1991) 19-42.
- [57] with M.C. Bustos and F. Paiva:
Control of continuous sedimentation of ideal suspension as an initial and boundary value problem. *Math. Methods Appl. Sci.* **12** (1990) 533-548.
- [58] with M.C. Bustos and F. Paiva:
Entropy boundary conditions in the theory of sedimentation of ideal suspensions. *Math. Methods Appl. Sci.*, **19** (1996) 679–697.
- [59] Analytical and numerical developments in 3D–boundary element methods for elastic problems. WCCM II 1990, Stuttgart. *Comp. Methods Appl. Mechanics Engrg.* **91** (1991) 1229-1239.
- [60] with C. Schwab:
On numerical cubatures of singular surface integrals in boundary element methods. *Numer. Math.* **62** (1992) 343-369.
- [61] with C. Schwab:
Kernel properties and representations of boundary integral operators. *Math. Nachr.* **156** (1992) 189-218.
- [62] with H. Schmitz and K. Volk:
On three–dimensional singularities of elastic fields near vertices. *Numerical Methods for Partial Differential Equations*, **9** (1993) 323-337 .
- [63] with J. Saranen:
Local residual–type error estimates for adaptive boundary element methods on closed curves. *Appl. Analysis* **48** (1993) 37-50 .
- [64] with B. Khoromskij:
Spectrally equivalent preconditioners for boundary equations in substructuring techniques. *East–West Journal of Numerical Mathematics* **1** (1993) 1-26.
- [65] with W. McLean and S. Prössdorf:
A fully–discrete trigonometric collocation method. *J. Integral Equations and Applications*, **5** (1993) 103-129 .
- [66] with R. Kieser and C. Schwab:
Numerical evaluation of singular and finite–part integrals on curved surfaces using symbolic manipulation. *Computing* **49** (1992), 279-301.
- [67] with M.A. Efendiev and H. Schmitz:
On some nonlinear potential problems. *Electron. J. Diff. Eqns.* **18** (1999) 1–17 (<http://ejde.math.swt.edu/Volumes/1999/18/abstr.html>).

- [68] with H. Berger and G. Warnecke:
Analysis of a FEM/BEM coupling method for transonic flow computations. *Math. Comp.* **66** (1997) 1407–1440.
- [69] with M.A. Efendiev:
Nonlinear Riemann–Hilbert problems for multiply connected domains. *Nonlinear Analysis, Theory, Methods & Applications* **27** (1996) 37–58.
- [70] with R. Duduchava:
The Wiener–Hopf method for systems of pseudodifferential equations with applications to crack problems. *Integral Equations and Operator Theory* **23** (1995) 294–335.
- [71] with V. Kozlov and H. Goldberg:
The behaviour of elastic fields and boundary integral Mellin techniques near conical points. *Mathem. Nachr.* **179** (1996) 95–133.
- [72] with M.A. Efendiev:
Nonlinear Riemann–Hilbert problems without transversality. *Mathem. Nachr.* **183** (1997) 73–89.
- [73] with G.C. Hsiao and B.N. Khoromskij:
Preconditioning for boundary element methods in domain decomposition. *Engineering Analysis with Boundary Elements* **25** (2001) 323–338.
- [74] with M.C. Bustos, F. Paiva and M. Kunik:
The polygonal approximation in the Kynch theory of batch sedimentation. In preparation.
- [75] with F. Concha, M.C. Bustos and E. Oelker:
Settling velocities of particular systems. Phenomenological theory of sedimentation processes: I. Batch sedimentation. In preparation.
- [76] with G.C. Hsiao and E. Schnack:
Hybrid coupled finite–boundary element methods for elliptic systems of second order. *Computational Mechanics Advances, Comp. Methods Appl. Mechanics Engrg.* **190** (2000) 431–485.
- [77] with C. Coclici:
On the treatment of the Kutta–Joukowski condition in transonic flow. *ZAMM* **79** (1999) 507–534.
- [78] with G. Gatica:
Coupling of mixed finite elements and boundary elements for linear and nonlinear elliptic problems. *Applicable Analysis* **63** (1996) 39–75.
- [79] with G. Gatica:
Coupling of mixed finite elements and boundary elements for an hyperelastic interface problem. *SIAM J. Numer. Anal.* **34** (1997) 2335–2356.

- [80] with C. Schwab:
On the extraction technique in boundary integral equations. *Math. Comp.* **68** (1999) 91–122.
- [81] with R. Duduchava und D. Elliott:
The spline collocation method for Mellin convolution equations. In preparation.
- [82] with I. Sloan:
Commutator properties for periodic splines. *Journal of Approximation Theory* **97** (1999) 254–281.
- [83] with H. Schulz and C. Schwab:
The computation of potentials near and on the boundary by an extraction technique for boundary element methods. *Comput. Methods Appl. Mech. Engrg.* **157** (1998) 225–238.
- [84] with I. Sloan:
Qualocation methods for elliptic boundary integral equations. *Numer. Math.* **79** (1998) 451–483.
- [85] with L. Jentsch and D. Natroshvili:
General transmission problems in the theory of elastic oscillations of anisotropic bodies. (Basic interface problems) *J.M.A.A.* **220** (1998) 397–433.
- [86] with R. Duduchava and A.–M. Sändig:
Interface cracks in anisotropic composites. *Math. Methods in the Appl. Sci.* **22** (1999) 1413–1446.
